## 1 General Information on Application of ZPU Międzyrzecz Sp. z o. o. Preinsulated Tubes and Fittings

Preinsulated tubes and fittings by ZPU Międzyrzecz Sp. z o.o are to be used in the construction of thermal distribution networks, whose function is to transmit a heating medium from its source up to the reception point. Preinsulated tubes and fittings are resistant to the medium with maximal working temperature of 165°C predicted for thirty-year lifetime.

The function of preinsulated tubes and fittings manufactured by is to transmit a heating medium, characterised either by high or low working parameters, hot water or other media used for process or construction purposes.

Preinsulated tubes and fittings by ZPU Międzyrzecz Sp. z o.o are composed of a steel line tube coaxially fitted in a casing pipe made of hard polyethylene of high density (PEHD) and a layer of thermal insulation either standard or standard, plus or plus plus made of rigid polyurethane foam (PUR) filling up the space between the pipes. ZPU Międzyrzecz Sp. z o.o preinsulated pipes, used in the transmission of hot water, are manufactured within the nominal diameters of 20 to 1200 mm, in standard lengths of 6 m, 12 m and 16 m<sup>1</sup>. Preinsulated products with galvanized steel carrier pipe are 6 m long, while the diameter range varies between 20 and 200 mm. The ends of preinsulate pipes and fittings are not insulated over a length of 150 mm ±10mm at diameters op to 200 mm, and overa length of 200 mm ±10mm for diameters 250 mm and more.

The pipes are produced by the continuous method (with or without an aluminum barrier) up to the diameter of the casing pipe Dz 355 mm, and by injection and foaming of PUR foam components in the full range of diameters.

ZPU Międzyrzecz Sp. z o. o. preinsulated pipes and fittings meet the requirements set down by standards PN-EN 253, PN-EN- 448, PN-EN 488, PN-EN- 489, PN - EN 13941 and PN-EN 14419.

Tees are made in solutions in accordance with PN EN 448, as directly welded, reinforced, with a "pull neck" and forged. As a standard, we produce tees as directly welded, while for tees where the diameter of the passage and recoil are the same as forged tees. If a different solution is required, it should be specified at the inquiry stage and confirmed in the order. There is also a possibility of making tees from the so-called "Pull-neck" on HDPE conduit.

In order to protect the PUR foam against oxygen diffusion, an aluminium diffusion barrier can be used between the insulation and the protective casing or inside the protective casing, or a protective casing made of polyethylene (PE-HD) with a thickened wall - polyethylene barrier - can be used.

In the case of fittings with a polyethylene barrier (thickened wall of the casing pipe), the product symbol is created by adding its wall thickness to the diameter of the casing pipe (e.g. K-20 (90 \* 5.0) / 90°, TW-32 (110 \* 5.0) / 25 (90 \* 5.0), etc.).

Suitability for use in construction of a construction product under the name: "Pre-insulated pipes, fittings and joint assemblies ZPU Międzyrzecz Sp.z o.o., to underground heating networks "states: National Technical Assessment ITB-KOT-2018/0286 edition 2, validity date 30 December 2024.

## 2 Properties of Materials Used in Preinsulated Pipes and Fittings by ZPU Międzyrzecz Sp. z o.o.

### CARRIER PIPE

The service pipe is an attested, seamless, seamed, galvanized or other steel pipe made in accordance with the Contractor's order

To increase the adhesion of rigid polyurethane foam (PUR) to steel pipe, the external surface of the steel pipe is shot blasted till it attains grade cleanliness Sa 2 according to PN-EN ISO 8501-1.

Pipe ends are bevelled and ready to be welded according to PN-EN ISO 9692-1.

### THERMAL (HEAT) INSULATION

Insulation is made of rigid polyurethane foam (PUR) homogenously filling the space between the pipes over the total length and in compliance with standard PN-EN- 253.

### CASING PIPE

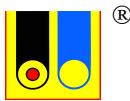

The casing pipe is made in accordance with the requirements of PN EN 253 with high density polyethylene (PEHD) in the PE 100 class.

The inner surface of polyethylene pipes is activated by the electrocoronation method to increase the adhesion of the rigid polyurethane foam.

The protective casing of pre-insulated pipes, fittings, armature and joint units of the ZPU Międzyrzecz Sp. z o.o. system has a test confirming the use of the products for the construction of above-ground heating networks.

## 3 Pipe Insulation Moisture Detection System

Preinsulated pipes and fittings ZPU Międzyrzecz Sp. z o.o. can be equipped with any system for detecting moisture in polyurethane insulation, i.e. impulse system (Nordic), resistive system (Brandes), HDW system or another indicated by the Customer. The installation consists of pipes built into the thermal insulation layer. This system signals moisture in the insulation where it occurs.

## 4 Cross-sections of Jacket and Carrier Pipes

*ZPU Międzyrzecz Sp. z o. o. pipes and fittings are manufactured from jacket and carrier pipes of the following diameters:*

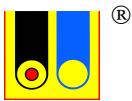

Steel Carrier Pipe				PEHD Jacket Pipe			PEHD Jacket Pipe			PEHD Jacket Pipe		
DN	Dz	welded	seamless	Insulation standard (Seria 1)			Insulation plus (Seria 2)			Insulation Plus Plus (Seria 3)

1200	1219,0	12,5	-	1400	12,5	12,5	-	-	-	-	-	-

DN - steel pipe nominal diameter; Dz - external diameter, Dzp - external diameter jacket pipe, gp - standard wall thickness, for pipes with a diffusion barrier and without a barrier; gpp - thickened wall, which is a diffusion barrier.

\* jacket pipe diameters produced on individual order.

The recommended diameters of casing pipes for pre-insulated pipes and fittings are given in the tables later in the catalogue. The tables provide geometric dimensions of pipes and fittings up to DN 600. In the case of products with nominal diameters greater than DN 600, geometric dimensions should be agreed individually. In the specification of the ordered pre-insulated products, the steel grade of the carrier pipe (seamed, seamless or other), the type (series) of thermal insulation, the type of moisture detection system built into the polyurethane insulation or its absence, and in the case of pipes also their length and the symbols specified in the catalogue should be used.

The specification of the pre-insulated products ordered should include the kind pipe's steel grade (welded, seamless or other), type (series) of thermal insulation, type of moisture detection system built into the polyurethane insulation or its absence, and in the case of pipes, also their length and symbols specified in the catalogue.

## 5 Preinsulated pipes

### 5.1 Straight preinsulated pipes

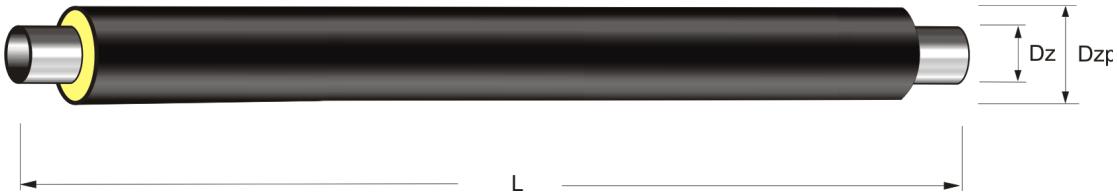

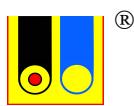

Table 1

500	508,0	630	6;12;16*	161,3	104,2	R-500/630
600	610,0	800	6;12;16*	-	149,3	R-600/800
700	711,0	900	6;12;16*	-	180,4	R-700/900
800	813,0	1000	6;12;16*	-	222,9	R-800/1000
900	914,0	1100	6;12;16*	-	276,9	R-900/1100
1000	1016,0	1200	6;12;16*	-	335,8	R-1000/1200
1200	1219,0	1400	6;12;16*	-	448,1	R-1200/1400

Note: When ordering specify steel grade (welded, seamless or other). Preinsulated pipes of diameters exceeding DN 600 - DN 1200 are manufactured if their length and filling diameter (insulation thickness) have been agreed with the customer.

\*Pipes with length L=16 m are manufacturing on individual customer's request.

\*\* Optional production after individual agreement.

## 5.2 Straight preinsulated pipes with diffusion barier

450	457,0	560	12	130,6	90,6	RG-450/560
500	508,0	630	12	161,3	104,2	RG-500/630

**Note:** When ordering specify steel grade (welded or seamless) and angle, bend direction. Preinsulated pipes of diameters exceeding DN 500 are manufactured if their length and filling diameter (insulation thickness) have been agreed with the customer.

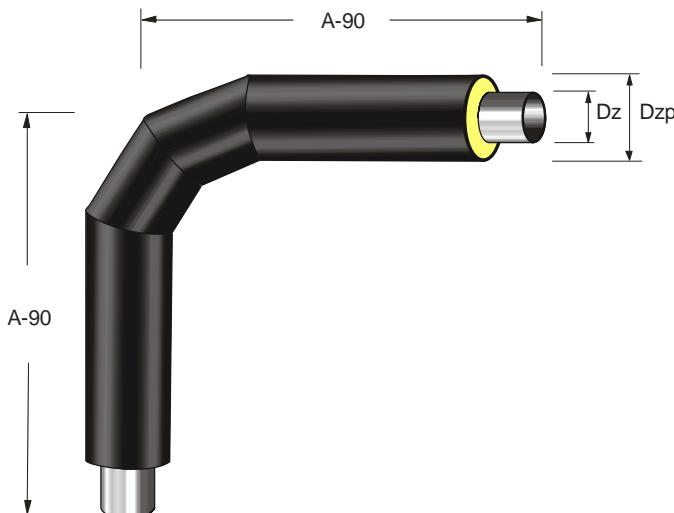

Other lengths of bent pipe sections are agreed individually with the Customer.

Bend pipes are manufactured without a diffusion barrier or with a diffusion barrier agreed with the Customer.

## 6 Specification of Preinsulated Fittings

### 6.1 Elbow 90°

Bend radius:  
Mechanical bending for:  
DN 20÷80       $3 \times Dz$   
DN 100÷300     $2,5 \times Dz$

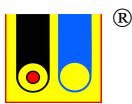

With "Hamburg" elbows for:  
DN 350÷1000     $1,5 \times Dz$   
\*DN 100÷300     $1,5 \times Dz$   
\*DN 350÷1000    $2,5 \times Dz$

Table 3

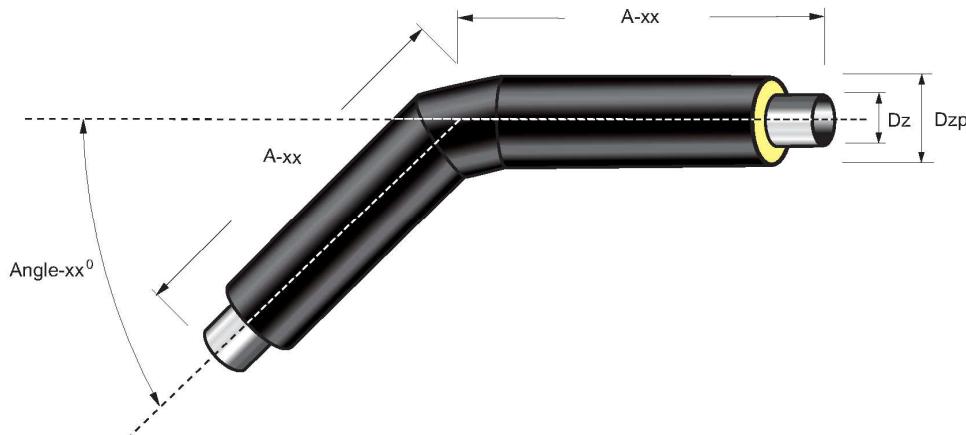

Steel Carrier Pipe		Jacket pipr	Dimension	Weight of preinsulated elbow	Catalogue reference number
Nominal diameter	External diameter	External diameter			
DN	Dz	Dzp	A 90	1 pcs	
mm	mm	mm	mm		
20	26,9	90	1000	5,6	K-20/90
25	33,7	90	1000	6,4	K-25/90
32	42,4	110	1000	8,0	K-32/90
40	48,3	110	1000	10,6	K-40/90
50	60,3	125	1000	13,0	K-50/90
65	76,1	140	1000	14,5	K-65/90
80	88,9	160	1000	17,5	K-80/90
100	114,3	200	1000	27,5	K-100/90
125	139,7	225	1000	33,0	K-125/90
150	168,3	250	1000	39,0	K-150/90
200	219,1	315	1000	50,0	K-200/90
250	273,0	400	1200	82,8	K-250/90
300	323,9	450	1500	151,0	K-300/90
350	355,6	500	1500	172,0	K-350/90
400	406,4	560	1500	218,0	K-400/90
450	457,0	630	1500	284,7	K-450/90
500	508,0	710	1500	328,8	K-500/90
600	610,0	800	1500	376,0	K-600/90

Note: Elements with diameters above DN 600 are manufactured according to geometric dimensions agreed with the customer.

\* Bends radius are manufacturing on individual customer's request.

## 6.2 Elbow xx° (any angle)

XX° means any elbow angle specified by the customer  
 (when placing an order)  
 - normally performed every 15° (**15°, 30°, 45°, 60°, 75°**)

Bend radius:  
 Mechanical bending for:  
 DN 20÷80      3 × Dz  
 DN 100÷300    2,5 × Dz

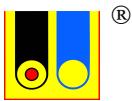

With "Hamburg" elbows for:  
 DN 350÷1000    1,5 × Dz  
 \*DN 100÷300    1,5 × Dz  
 \*DN 350÷1000   2,5 × Dz

**Table 3A**

Steel carrier pipe		Jacket pipe	dimension	Weight of preinsulated elbow	Catalogue reference number
Nominal diameter	External diameter	External diameter			
DN	Dz	Dzp	A xx	1 pcs	
mm	mm	mm	mm		
20	26,9	90	1000	5,6	K-20/xx
25	33,7	90	1000	6,4	K-25/xx
32	42,4	110	1000	8,0	K-32/xx
40	48,3	110	1000	8,5	K-40/xx
50	60,3	125	1000	12,0	K-50/xx
65	76,1	140	1000	14,5	K-65/xx
80	88,9	160	1000	19,5	K-80/xx
100	114,3	200	1000	28,5	K-100/xx
125	139,7	225	1000	36,5	K-125/xx
150	168,3	250	1000	43,5	K-150/xx
200	219,1	315	1000	70,5	K-200/xx
250	273,0	400	1200	104,4	K-250/xx
300	323,9	450	1500	177,0	K-300/xx
350	355,6	500	1500	199,0	K-350/xx
400	406,4	560	1500	253,0	K-400/xx
450	457,0	630	1500	284,7	K-450/xx
500	508,0	710	1500	328,8	K-500/xx
600	610,0	800	1500	429,0	K-600/xx

**Note:** Elements with diameters above DN 600 are manufactured according to geometric dimensions agreed with the customer.

\* Bends radius are manufacturing on individual customer's request.

### 6.3 Elevated tee

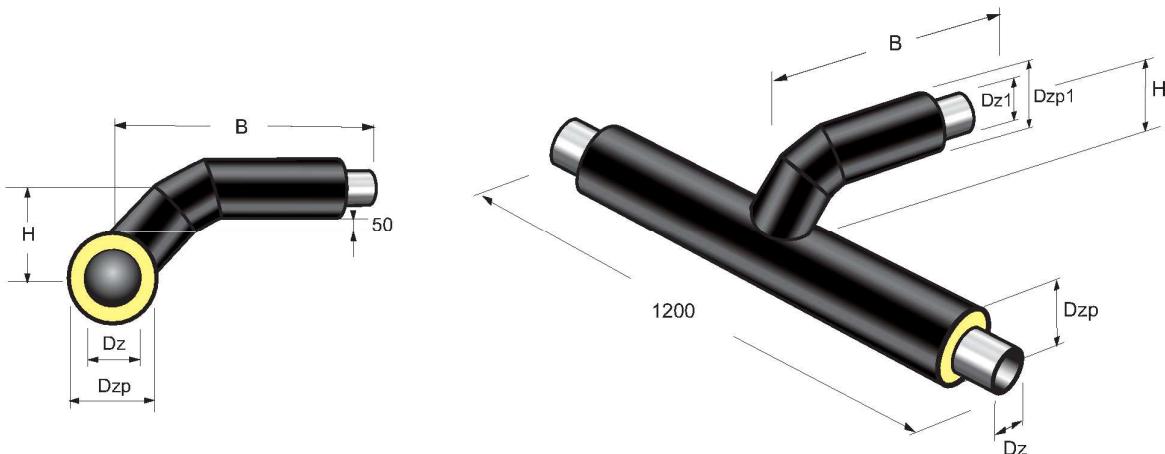

Table 4

Nominal diameter	Straight Section		Vertical section		H	B	Catalogue reference number
	Carrier pipe external diameter	Jacket pipe external diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp	Dz1	Dzp1	mm	mm	mm
20	26,9	90	26,9	90	140	700	TW-20/20
25	33,7	90	26,9	90	140	700	TW-25/20
32	42,4	110	33,7	90	150	700	TW-32/25
40	48,3	110	42,4	110	160	700	TW-40/32
50	60,3	125	48,3	110	170	700	TW-50/40
65	76,1	140	60,3	125	185	900	TW-65/50
80	88,9	160	76,1	140	200	900	TW-80/65
100	114,3	200	88,9	160	230	900	TW-100/80
125	139,7	225	114,3	200	265	900	TW-125/100
150	168,3	250	139,7	225	285	900	TW-150/125
200	219,1	315	168,3	250	335	900	TW-200/150
250	273,0	400	219,1	315	410	1100	TW-250/200
300	323,9	450	273,0	400	475	1100	TW-300/250

**Note:** 1. Tees are fabricated in a free selection of diameters  
2. The H dimension changes along with branching off pipe diameter.  
3. Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.

## 6.4 Reducing lateral tee

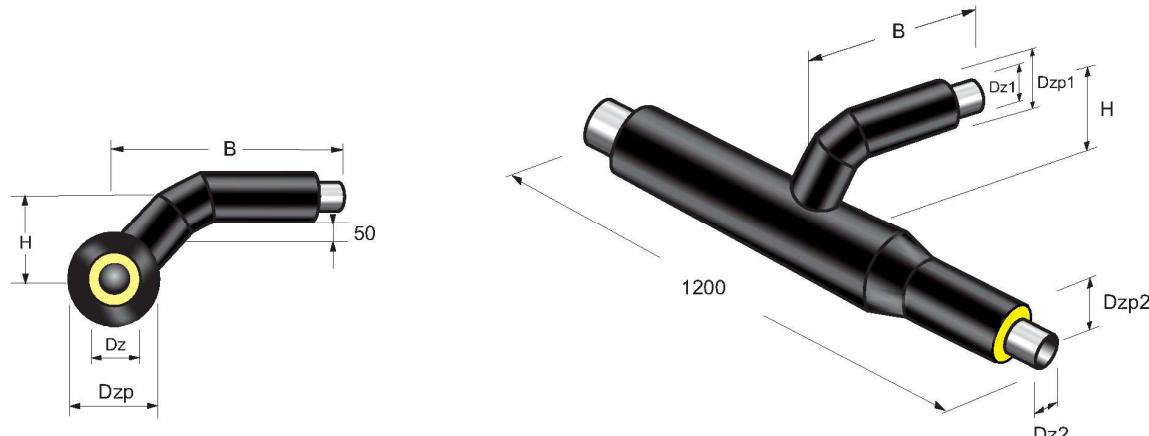

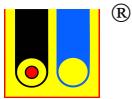

Table 5

Nominal diameter	Straight Section		Vertical section		Reduced pipe		H	B	Catalogue reference number

250	273,0	400	219,1	315	200	1500	TR-250/200
300	323,9	450	273,0	400	250	1800	TR-300/250

**Note:**

1. Tees are fabricated in a free selection of diameter.
2. The H dimension changes along with branching off pipe diameter.
3. They can also be fabricated as reducing tees in any diameters.
4. Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.
5. In tees with a pull-out collar in steel pipe and on polyethylene, the "H" dimension is increased by the height of the pull-out collar.

## 6.11 Flat Tee

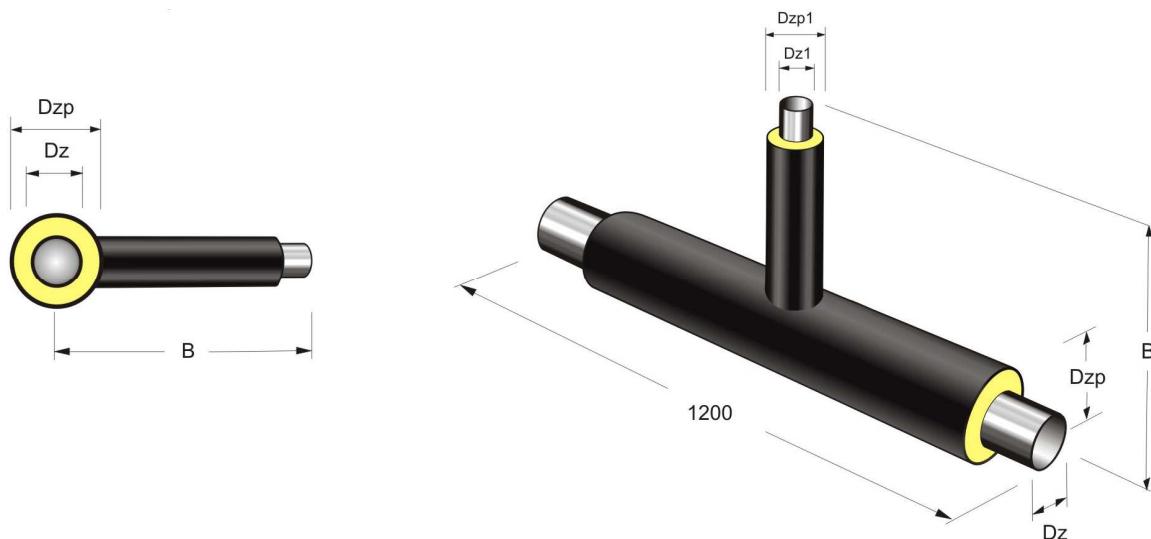

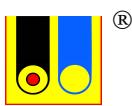

Table 12

600/500	610,0	800	508,0	710	1200	Z-600/500

**Note:** 1. Reducing pipes are fabricated in a free selection of diameters  
2. Elements with diameters above DN 600 are manufactured according to geometric dimensions agreed with the customer.

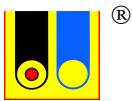

## 6.16 Transition Fittings

**Table 17**

Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter	Lenght	External flange diameter	Catalogue Reference number
DN	Dz	Dzp	L	D	
mm	mm	mm	mm	mm	
20	26,9	90	2000	140	PS-20
25	33,7	90	2000	140	PS-25
32	42,4	110	2000	140	PS-32
40	48,3	110	2000	140	PS-40
50	60,3	125	2000	170	PS-50
65	76,1	140	2000	200	PS-65
80	88,9	160	2000	220	PS-80
100	114,3	200	2500	260	PS-100
125	139,7	225	2500	300	PS-125
150	168,3	250	2500	320	PS-150
200	219,1	315	2500	400	PS-200
250	273,0	400	2500	500	PS-250
300	323,9	450	2500	560	PS-300

**Note:** 1. Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.  
2. Fixed point concrete block diameters are specified in the Manual "Static and Designed Calculations", see p. 30.

## 6.17 Wall Mounted Fixed Point

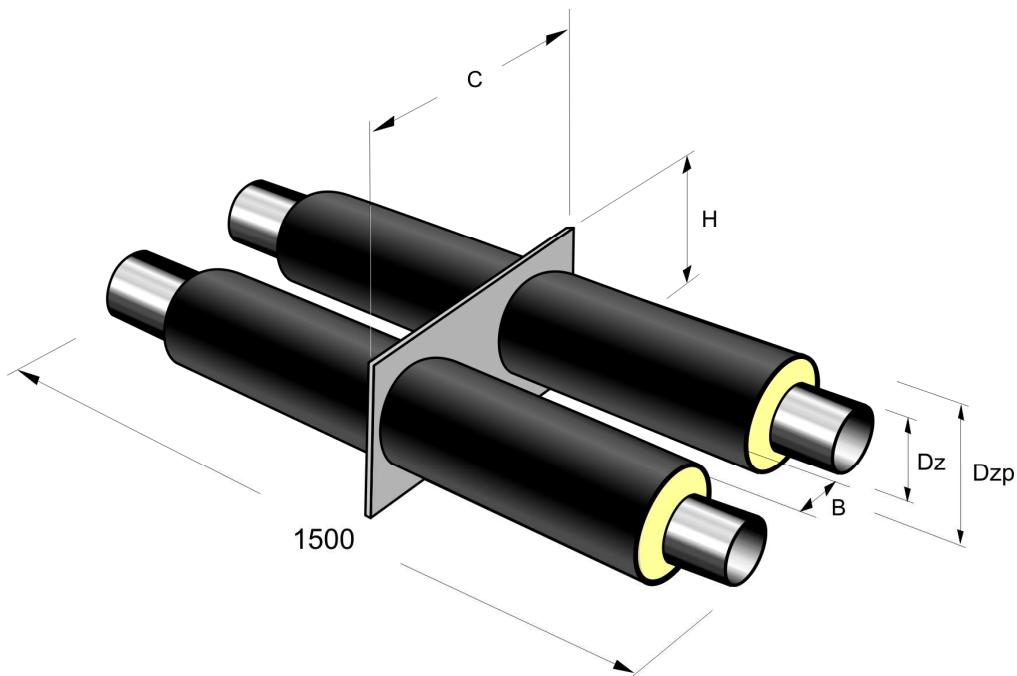

Table 18

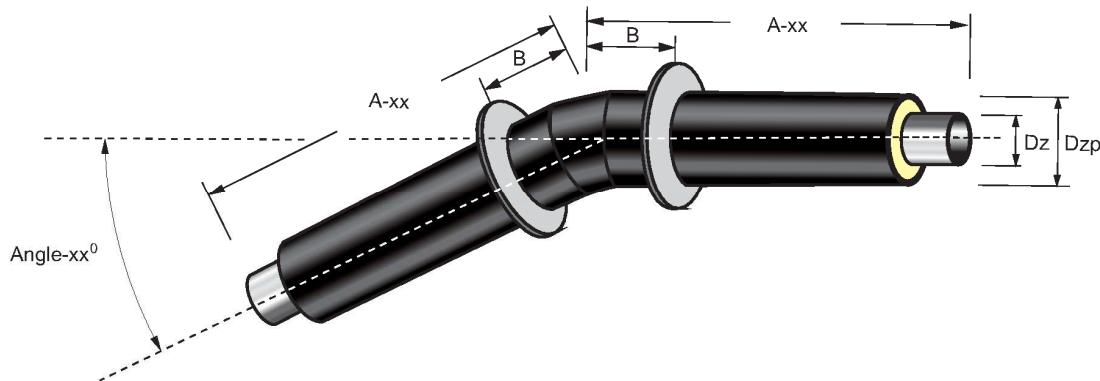

Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter	H	B	C	Catalogue Reference number
mm	mm	mm	mm	mm	mm	
20	26,9	90	110	150	350	PSW-20
25	33,7	90	110	150	350	PSW-25
32	42,4	110	130	150	390	PSW-32
40	48,3	110	130	150	390	PSW-40
50	60,3	125	145	150	420	PSW-50
65	76,1	140	160	150	450	PSW-65
80	88,9	160	180	150	490	PSW-80
100	114,3	200	220	150	570	PSW-100
125	139,7	225	245	150	620	PSW-125
150	168,3	250	270	150	670	PSW-150
200	219,1	315	335	150	800	PSW-200
250	273,0	400	440	200	1010	PSW-250
300	323,9	450	490	200	1140	PSW-300

**Note:** Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.

This sheet also applies to fixed points marked with the "PSS" symbol.

## 6.18 Angle fixed point xx°

XX° means any angle specified by the customer (when placing an order) - standard 15° or 30°

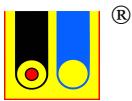

Bend radius:  
Mechanical bending for:  
DN 20÷80      3 × Dz  
DN 100÷300    2,5 × Dz

With "Hamburg" elbows for::  
DN 350÷1000    1,5 × Dz

Table 19

Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter	Lenght	Diameter	Distance	Catalogue Reference number
DN	Dz	Dzp	A-xx	D	B	
mm	mm	mm	mm	mm	mm	
20	26,9	90	1000	140	230	PSK-20/xx
25	33,7	90	1000	140	230	PSK-25/xx
32	42,4	110	1000	140	230	PSK-32/xx
40	48,3	110	1000	140	240	PSK-40/xx
50	60,3	125	1000	170	250	PSK-50/xx
65	76,1	140	1000	200	260	PSK-65/xx
80	88,9	160	1500	220	270	PSK -80/xx
100	114,3	200	1500	260	270	PSK-100/xx
125	139,7	225	1500	300	270	PSK-125/xx
150	168,3	250	1500	320	270	PSK-150/xx
200	219,1	315	1500	400	380	PSK-200/xx
250	273,0	400	1500	500	400	PSK-250/xx
300	323,9	450	2000	560	420	PSK-300/xx

**Note:** Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.

## 6.19 Single bellow longitudinal compensator operating under a nominal pressure of 1.6 MPa

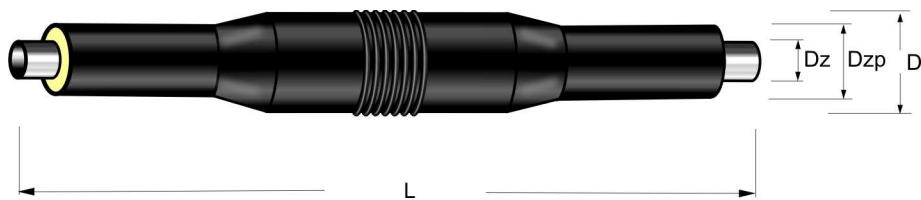

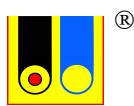

Table 20

Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter	Diameter	Lenght	Compensation increment	Catalogue Reference number

600	610,0	800	900	3000	90*	KP-600-90/2,5

Note: Elements with diameters above DN 600 are manufactured according to geometric dimensions agreed with the customer.

\* Compensators can also be made with a compensation increment of 180 mm.

## 7 Preinsulated Steel Fittings- Valves

### 7.1 Shutoff Ball Valve

A preinsulated shutoff ball valve is supplied together with its fittings, which comprise: a wrench to open and shutoff the valve, a street box and a jacket pipe connecting the spindle and street box

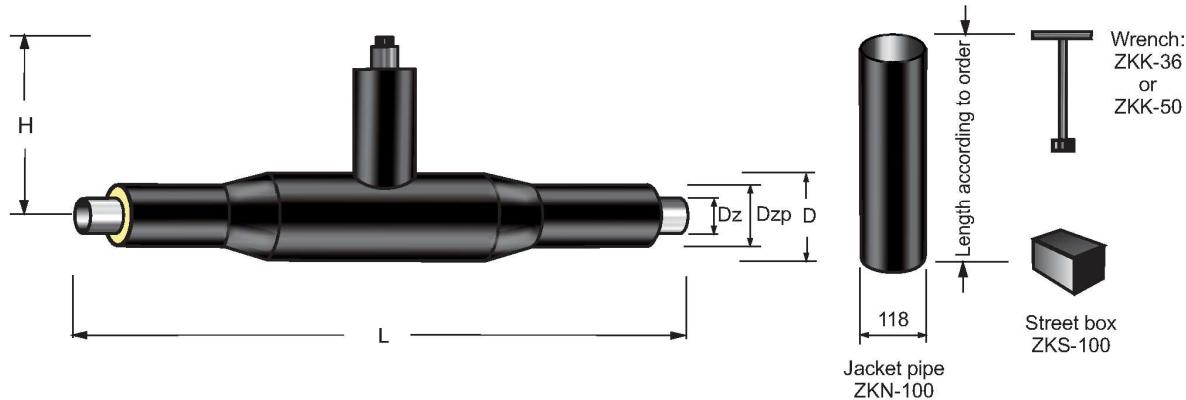

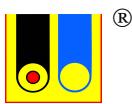

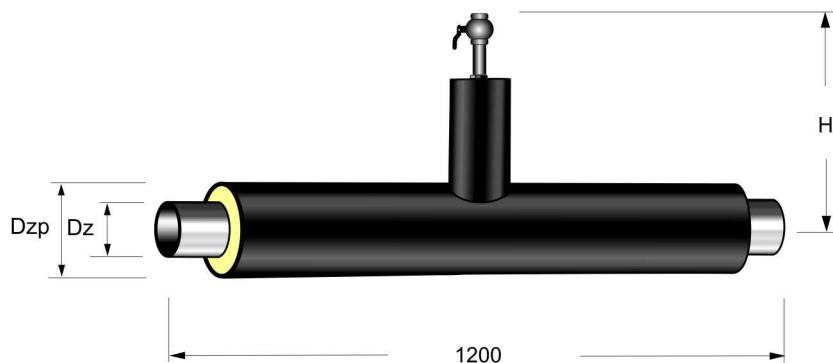

Table 22

Straight pipe			D	H	L	Catalogue Reference number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter				
DN	Dz	Dzp	mm	mm	mm	
20	26,9	90	110	380	1200	ZK-20
25	33,7	90	110	382	1200	ZK-25
32	42,4	110	110	386	1200	ZK-32
40	48,3	110	125	400	1200	ZK-40
50	60,3	125	140	406	1200	ZK-50
65	76,1	140	160	415	1200	ZK-65
80	88,9	160	200	425	1200	ZK-80
100	114,3	200	225	449	1500	ZK-100
125	139,7	225	250	454	1500	ZK-125
150	168,3	250	315	475	1500	ZK-150
200	219,1	315	400	515	1800	ZK-200
250	273,0	400	450	557	1800	ZK-250
300	323,9	450	560	610	1800	ZK-300

**Note:** As standard, cut-off valves with reduced flow are produced, for a working pressure of min. 1.6 MPa  
At the Customer's request, valves with other parameters indicated in the order are produced (e.g. full-flow valves, for a working pressure of 2.5 MPa, etc.)  
Elements with diameters above DN 300 are produced according to geometric dimensions agreed with the Customer.  
The table provides the minimum dimension H, which may vary depending on the type of cut-off valve used (e.g. reduced flow, full-flow, etc.) and depending on the supplier of the steel valve and the Customer's requirements.  
For diameters from DN20 to DN80, the cut-off valves are supplied complete with a ZKN casing pipe, a ZKS street box and a ZKK wrench. From DN100, valves are supplied complete with a ZKK wrench, for installation in concrete ring wells with a minimum diameter of 600 mm.

## 7.2 Vent ball valve

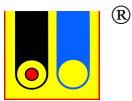

**Table 23**

Straight pipe			Diameter of vent valve	H	Catalogue Reference number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp			
mm	mm	mm	mm	mm	
25	33,7	90	33,7	384	ZD-25
32	42,4	110	33,7	388	ZD-32
40	48,3	110	33,7	403	ZD-40
50	60,3	125	33,7	410	ZD-50
65	76,1	140	33,7	414	ZD-65
80	88,9	160	33,7	427	ZD-80
100	114,3	200	33,7	450	ZD-100
125	139,7	225	33,7	455	ZD-125
150	168,3	250	33,7	457	ZD-150
200	219,1	315	33,7	515	ZD-200
250	273,0	400	33,7	560	ZD-250
300	323,9	450	33,7	756	ZD-300

**Note:** Stainless steel vent valves with a threaded end.

Elements with diameters above DN 300 are produced according to geometric dimensions agreed with the Customer.

## 7.3 Strain Ball Valve

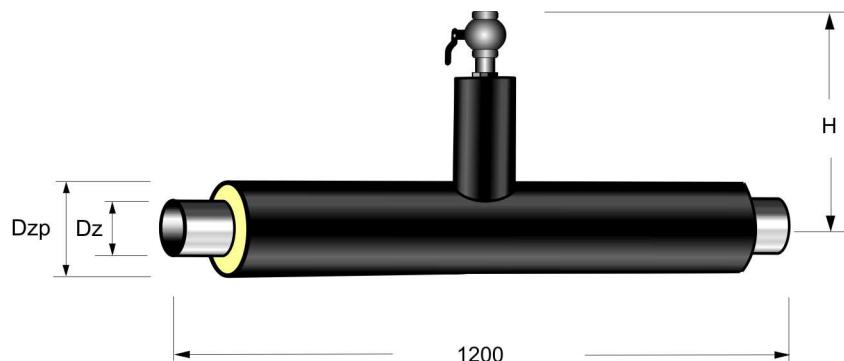

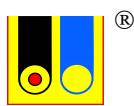

Table 24

Straight pipe			Diameter of strain valve	H	Catalogue Reference number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp	mm	mm	
40	48,3	110	48,3	403	ZO-40
50	60,3	125	48,3	410	ZO-50
65	76,1	140	48,3	414	ZO-65
80	88,9	160	48,3	427	ZO-80
100	114,3	200	48,3	450	ZO-100
125	139,7	225	48,3	455	ZO-125
150	168,3	250	48,3	457	ZO-150
200	219,1	315	60,3	515	ZO-200
250	273,0	400	60,3	560	ZO-250
300	323,9	450	60,3	756	ZO-300

**Note:** Stainless steel vent valves with a threaded end.  
Elements with diameters above DN 300 are produced according to geometric dimensions agreed with the Customer.

## 7.4 Shutoff ball valve and vent valve assembly

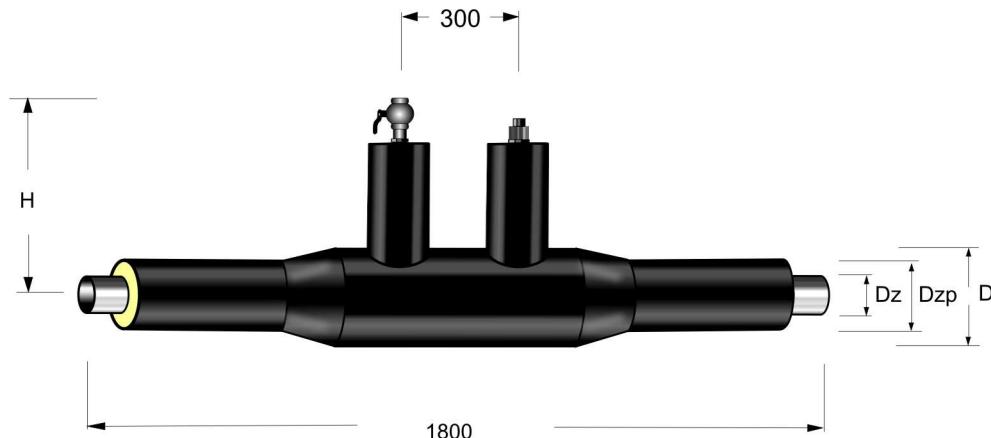

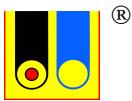

Table 25

Straight pipe			D	H	Catalogue Reference Number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp	mm	mm	
mm	mm	mm	mm	mm	
32	42,4	110	110	388	ZKD-32
40	48,3	110	125	403	ZKD-40
50	60,3	125	140	410	ZKD-50
65	76,1	140	160	414	ZKD-65
80	88,9	160	200	427	ZKD-80
100	114,3	200	225	450	ZKD-100
125	139,7	225	250	455	ZKD-125
150	168,3	250	315	457	ZKD-150
200	219,1	315	400	515	ZKD-200
250	273,0	400	450	560	ZKD-250
300	323,9	450	560	756	ZKD-300

Vent valve diameter::

For pipe of nominal diameters up to 300 mm      33,7 mm  
For pipe of nominal diameters above 300 mm      48,3 mm

Note: Vent valve made of stainless steel with a threaded end.  
Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.  
As standard, cut-off valves with reduced flow are produced, for a working pressure of min. 1.6 MPa.  
At the customer's request, valves with other parameters indicated in the order are manufactured (e.g. full-flow valves, for a working pressure of 2.5 MPa, etc.).  
The table provides the minimum dimension H, which may vary depending on the type of cut-off valve used (e.g. reduced flow, full-flow, etc.) and depending on the supplier of the steel valve and the customer's requirements.

## 7.5 Single strain valve shutoff ball valve

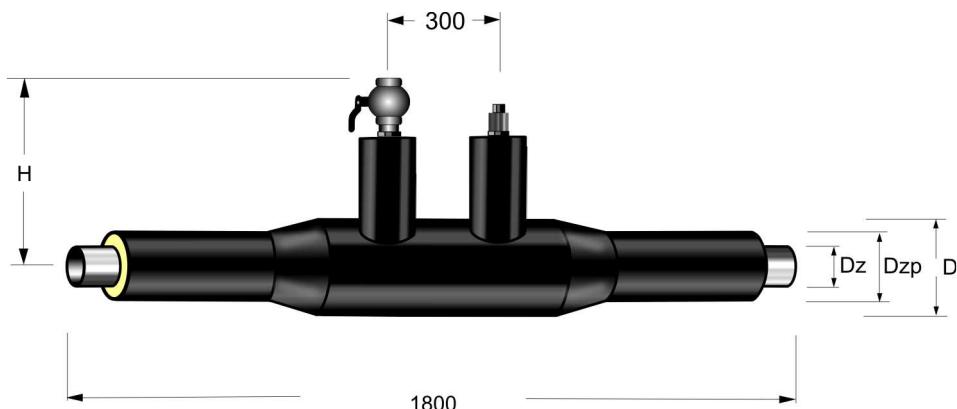

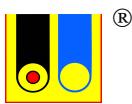

Table 26

Straight pipe			D	H	Catalogue Reference Number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp	mm	mm	
40	48,3	110	125	400	ZKO-40
50	60,3	125	140	406	ZKO-50
65	76,1	140	160	415	ZKO-65
80	88,9	160	200	425	ZKO-80
100	114,3	200	225	449	ZKO-100
125	139,7	225	250	454	ZKO-125
150	168,3	250	315	475	ZKO-150
200	219,1	315	400	515	ZKO-200
250	273,0	400	450	557	ZKO-250
300	323,9	450	560	610	ZKO-300

Strain valve diameter:

For pipe	up to DN 150 mm	48,3 mm
	from DN 200 to DN 300 mm	60,3 mm
	from DN 350 to DN 400 mm	88,9 mm
	above DN 400 mm	114,3 mm

Note: Strain valve made of stainless steel with a threaded end.  
Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.  
As standard, cut-off valves with reduced flow are produced, for a working pressure of min. 1.6 MPa.  
At the customer's request, valves with other parameters indicated in the order are manufactured (e.g. full-flow valves, for a working pressure of 2.5 MPa, etc.).  
The table provides the minimum dimension H, which may vary depending on the type of cut-off valve used (e.g. reduced flow, full-flow, etc.) and depending on the supplier of the steel valve and the customer's requirements.

## 7.6 Strain and vent shutoff ball valve

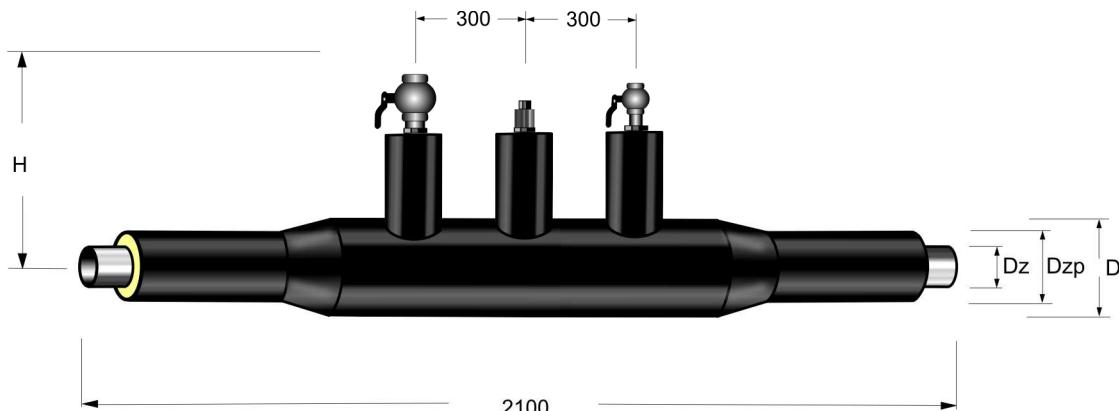

Table 27

Straight pipe			D	H	Catalogue Reference Number
Nominal diameter	Carrier pipe external diameter	Jacket pipe external diameter			
DN	Dz	Dzp	mm	mm	
40	48,3	110	125	400	ZKOD-40
50	60,3	125	140	406	ZKOD-50
65	76,1	140	160	415	ZKOD-65
80	88,9	160	200	425	ZKOD-80
100	114,3	200	225	449	ZKOD-100
125	139,7	225	250	454	ZKOD-125
150	168,3	250	315	475	ZKOD-150
200	219,1	315	400	515	ZKOD-200
250	273,0	400	450	557	ZKOD-250
300	323,9	450	560	610	ZKOD-300

Valve diameter:

Strain / Vent

For pipe of nominal diameter:

33,7 mm / 48,3 mm

up to DN 150 mm

33,7 mm / 60,3 mm

from DN 200 to DN 300 mm

48,3 mm / 88,9 mm

from DN 350 to DN 400 mm

48,3 mm / 114,3 mm

above DN 400 mm

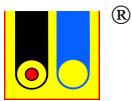

Note: Vent/strain valve made of stainless steel with a threaded end.

Elements with diameters above DN 300 are manufactured according to geometric dimensions agreed with the customer.

As standard, cut-off valves with reduced flow are produced, for a working pressure of min. 1.6 MPa.

At the customer's request, valves with other parameters indicated in the order are manufactured (e.g. full-flow valves, for a working pressure of 2.5 MPa, etc.).

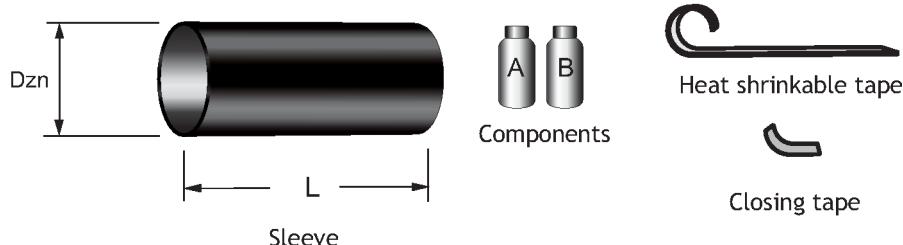

The table provides the minimum dimension H, which may vary depending on the type of cut-off valve used (e.g. reduced flow, full-flow, etc.) and depending on the supplier of the steel valve and the customer's requirements.

## 8 Coupling Unit

### 8.1 Common coupling N

(HPDE sleeve sealed with heat shrinkable tape).

**Table 28**

Nominal diameter	Carrier pipe external diameter	Sleeve external diameter	Length	Components		Heat shrinkable tape	Closing tape	Catalogue Reference Number

250	450	480	700	1948	3275	2	NTX+M-250/480

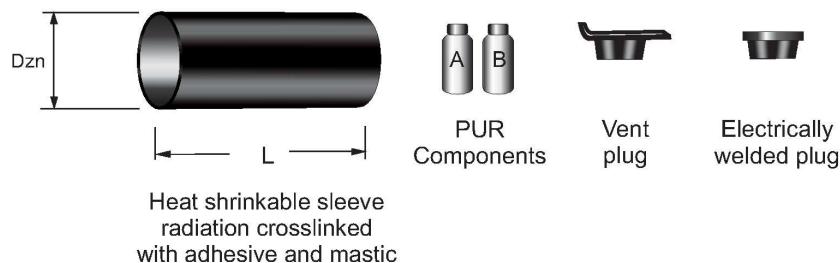

**Note:**

1. The number of components for dimensions above DN300 is agreed individually with the customer.
  2. The sleeve is produced with glue and mastic.
  3. The length tolerance L of the radiation cross-linked heat shrinkable sleeve is  $+10/-20$  mm
  4. Oval - not tolerated.
  5. At the customer's request, the heat shrink sleeve can be supplied with two factory-made venting and filling holes for PUR foam, with a place prepared for welding plugs
- The table shows the minimum outer diameters of the sleeves.  
 We also manufacture larger sleeve diameters than those given in the tables above.

### 8.2.3 Heat shrinkable radiation crosslinked joint, NTX-II type

(Heat-shrinkable PE-Xc sleeve with two factory-made mounting holes with a place prepared for welding the plug)

**Table 31**

250	400	430	700	450	145	2	2	NTS-250/430
300	450	480	700	450	160	2	2	NTS-300/480

The table shows the minimum outer diameters of the sleeves.  
Oval - not tolerated.

### 8.2.5 Heat shrinkable bend coupling - NSRK

(Heat shrinkable bend sleeve)

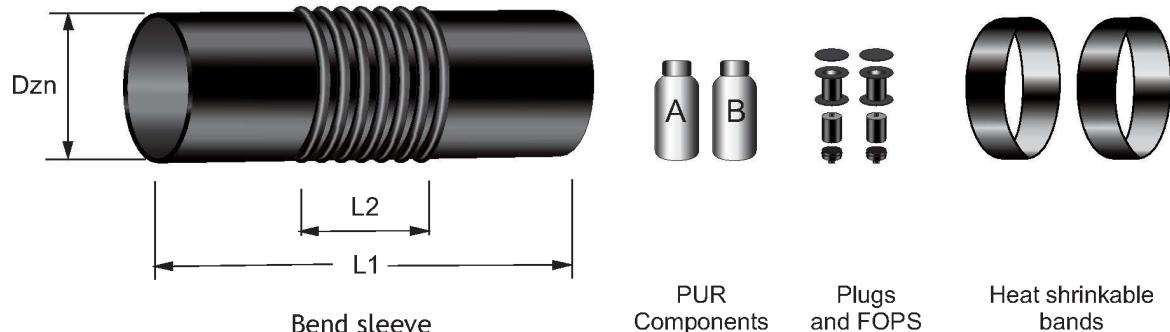

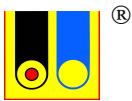

Table 33

Nominal diameter	Jacket pipe external diameter	External diameter	Length of bend sleeve		PUR components		Centring element	Heat shrinkable band	Plugs and FOPS	Catalogue Reference Number
DN	Dzp	Dzn	L1	L2	A	B				
mm	mm	mm	mm	mm	g	g	szt	szt	kpl	
25	90	103	980	560	212	356	1	2	1	NSRK-25/103
32	110	125	980	560	268	451	1	2	1	NSRK-32/125
40	110	125	980	560	259	435	1	2	1	NSRK-40/125
50	125	140	1050	630	340	572	1	2	1	NSRK-50/140
65	140	156	1050	630	425	714	1	2	1	NSRK-65/156
80	160	177	1050	630	526	885	1	2	1	NSRK-80/177
100	200	218	1120	700	876	1473	1	2	1	NSRK-100/218
125	225	244	1220	800	1122	1885	1	2	1	NSRK-125/244
150	250	269	1340	920	1475	2479	1	2	1	NSRK-150/269

The table shows the minimum outer diameters of the sleeves.

The length L1 given in the table is an example and depends on the manufacturer of the elbow sleeve.

The elbow joint does not include the steel elbow. Hamburg elbow must be ordered separately.

### 8.3 Electrically Welded Coupling

#### 8.3.1 Electrically Welded Coupling - close type

(HPDE sleeve sealed with heat shrinkable band))

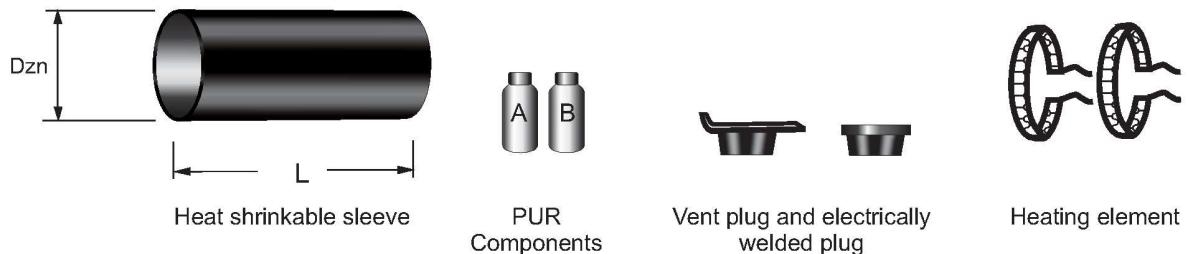

Table 34

65	140	40	110	340	1200	160	140	TPG-65/40
80	160	50	125	360	1200	200	160	TPG-80/50
100	200	65	140	380	1200	225	180	TPG-100/65
125	225	80	160	400	1200	250	200	TPG-125/80
150	250	100	200	400	1200	315	250	TPG-150/100

**Note:** TPE tees are fabricated to accommodate any mains diameter and branching off pipe diameter up to DN 150.  
TPE, hot tapping valve and branch elbow must be ordered as separate items.

## 12 Expansion Cushions.

Expansion cushions:

- soft type - PUR
- hard type - PE

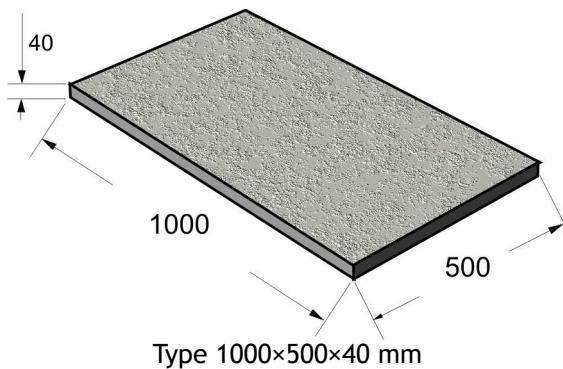

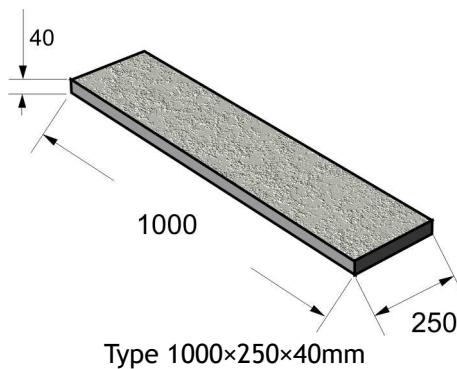

Table 43

Nominal diameter	Jacket pipe external diameter	Expansion cushions dimension			Expansion cushions type
		Lengths	Width	Thickness	
20	90	1000	250	40	1000x250x40
25	90	1000	250	40	1000x250x40
32	110	1000	250	40	1000x250x40
40	110	1000	250	40	1000x250x40
50	125	1000	250	40	1000x250x40
65	140	1000	250	40	1000x250x40
80	160	1000	250	40	1000x250x40
100	200	1000	250	40	1000x250x40
125	225	1000	500	40	1000x500x40
150	250	1000	500	40	1000x500x40
200	315	1000	500	40	1000x500x40
250	400	1000	500	40	1000x500x40
300	450	1000	500	40	1000x500x40

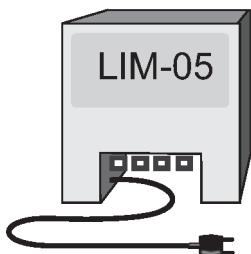

**Note:** Expansion cushions for preinsulated pipes with diameters DN 300 mm must be the type 1000x500x40 mm. Their quantity will be calculated individually depending on casing pipe diameter.

At the stage of submitting an inquiry or order, the type and dimensions of the expansion cushions should be specified.

## 13 Leak detection system

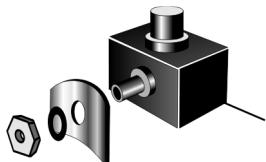

### 1. Measuring device
